

# Case Study: Aylesbury Police Station, Aylesbury

Thames Valley Police, as part of a multi-million pound investment programme, renovated or rebuilt a number of police station buildings across Oxfordshire, Buckinghamshire and Berkshire.

At Aylesbury Police Station, the newly built custody areas have been illuminated by Designplan luminaires. Our fittings are located in the cells, corridors, office areas, the van dock, toilets, medical room and sign-in desk.

Designed to meet stringent regulations, the luminaires specified can resist impacts of up to 150 joules of force (IK16), seven and a half times more than a standard IK10 fitting (20 joules). This helps ensure they provide a safe environment for both the police workforce and detainees.

*"We tested the market for potential suppliers, but we soon established that Designplan's Home Office approved products offered the perfect mix of quality and reliability across their whole range. We are using Designplan light fittings at six different sites in total – as their products provide a robust, cost-effective lighting solution."*
