

CIBSE accredited Robust Lighting CPD

CPDs

Our new CIBSE accredited CPD looks at how challenging environments are illuminated. We examine vandal resistance, adverse weather conditions, ease of maintenance and through life costs. Product standards are explained including IK (EN 62262) and IP (EN60529) ratings.

We explain the manufacturing process used to ensure luminaire durability and analyse the light source, dispelling the myths surrounding the use of LEDs.

We focus on transport, social housing, custodial, secure healthcare and urban exterior. Applications are identified and the market specific standards for robust anti-ligature luminaire, together with advice on reducing the cost of ownership and ensuring technology upgrades are sustainable.

You will receive two hours of your CIBSE CPD requirements for attending.

To arrange our Robust Lighting seminar, either at your premises or at our factory in Sutton, Surrey please contact Claire McCarthy at claire.mccarthy@designplan.co.uk or 020 8254 2023.
