

GRAMPIANS THERAPEUTIC COMMUNITY

VICTORIA, AUSTRALIA

In partnership with
eaglelightingaustralia

Designplan's Australian sister company, Eagle Lighting, were appointed to provide lighting for The Grampians Therapeutic Community - the first state-funded purpose-built alcohol and drug residential service in Victoria.

BACKGROUND

The facility houses 20 dedicated residential rehab beds, taking in 80 patients a year. The facility will lead to reduced waiting times and improved treatment outcomes for clients and families.

Grampians Therapeutic Community will lead to improved support for regional clients and families seeking drug treatment pathways.

LIGHTING DESIGN

With the safety of both staff and residents paramount, Designplan luminaires were selected to ensure there were no light fittings in areas the residents had access to that may serve as a potential ligature point for self-harm.

The Designplan luminaires selected are also impact, water and dust resistant, therefore able to be used in wet areas and exterior locations, thus ensuring continuity of lighting design throughout the facility.

LUMINAIRES SELECTED

Anti Ligature RDL Downlights for patient rooms, quiet rooms, and outdoor dining areas – residential spaces.

Tuscan Antiligature for treatment rooms (including Gym, art room, group therapy rooms).

Impact resistant Basilica for all external walls.

Bedhead AL installed over all beds for safe individual operation by the resident.

STAKEHOLDERS

This project was built in partnership with the Victorian Health and Human Services Building Authority, Bamford Architects and builders, S.J. Weir.

Services Engineers: BRT Consulting (Elec/Mech and Hydraulic)

This new service is managed by Windana Drug and Alcohol Recovery.

DESIGNPLAN LIGHTING

DESIGNED TO LAST

LUMINAIRES FOR DEMANDING APPLICATIONS

Our luminaires are designed for applications that require robustly constructed, reliable and easy to install and maintain lighting. Our market sectors include transport, social housing, custodial, secure healthcare and urban.

Transport

Social Housing

Custodial

Secure Healthcare

Urban
