

EMERGENCY LIGHTING

FOR CHALLENGING ENVIRONMENTS

You will receive 2 hours' worth of CIBSE points and a certificate for joining our hour-long presentation.

Emergency lighting for challenging environments

This CIBSE accredited CPD seminar looks at why we need emergency lighting and who is responsible for ensuring compliance. We examine specifics including typical applications, system definitions and exit sign requirements. We analyse the pros and cons of different system types and examine changes to BS5266-1:2016.

Best practice tips will be provided regarding battery management and lighting design. The CPD seminar concludes with several case studies. We identify specific emergency lighting requirements in social housing, custodial, secure healthcare and transport applications.

Booking a place

To arrange our emergency lighting for challenging environments CPD, at your premises or at our head office in Sutton, please contact our marketing department at marketing@designplan.co.uk or call **020 8254 2020**.
