

ROBUST LIGHTING

You will receive 2 hours' worth of CIBSE points and a certificate for joining our hour-long presentation.

Robust lighting

This CIBSE accredited CPD seminar looks at how challenging environments are illuminated. We examine vandal resistance, adverse weather conditions, ease of maintenance and through life costs.

Product standards are explained, including IK (EN 62262) and IP (EN60529) ratings. We identify the manufacturing processes used to ensure luminaire durability and analyse the light source, dispelling the myths surrounding the use of LEDs.

Finally, we will look at some challenging applications in detail. We focus on transport, social housing, custodial, secure healthcare and urban exterior.

Booking a place

To arrange our robust lighting CPD, at your premises or at our head office in Sutton, please contact our marketing department at marketing@designplan.co.uk or call **020 8254 2020**.
